Data Analyst

- 4+ years of experience in the data analytics field
- Expertise in data migration, data visualization, and data analysis
- Proven ability to extract insights from large datasets
- Strong communication and presentation skills
- Adept at working independently and as part of a team
- A very quick learner, have excellent analytical and visualisation skills, an efficient problem solver, keen to explore new technologies and love to face challenging tasks.

Skills

- Data Analysis: Proficient in extracting, cleaning, and transforming complex datasets using SQL, Python, and R. Experienced in using statistical methods and tools for data exploration, visualization, and modeling.
- Data Visualization: Skilled in creating visually compelling dashboards and reports using Power BI, and Excel to effectively communicate insights.
- Statistical Analysis: Solid understanding of statistical techniques and methodologies, including hypothesis testing, regression analysis, and time series analysis.
- Machine Learning: Familiarity with machine learning algorithms such as decision trees, logistic regression, and clustering. Experience in implementing and evaluating models using libraries like Keras and TensorFlow.
- Database Management: Proficient in working with relational databases (MySQL, SQL, Clickhouse) and querying large datasets efficiently.
- Problem Solving: Strong analytical and problem-solving abilities, with a keen attention to detail and a systematic approach to data analysis.
- Communication: Excellent verbal and written communication skills, with the ability to present complex findings in a clear and concise manner to both technical and non-technical audiences.

Technology

- Development: MYSQL, Clickhouse, JavaScript, JSON, XML, HTML, Java, Django, JRXML, CSS, Control M, Batch jobs in SAAS
- Tools: MySQL Workbench, Informatica, Bluezone, MobaXterm, Spring Tool suite 4, Notepad++, WinSCP, Postman, PyCharm, Visual Studio Code, putty, AQT, MS Access, AWS, Excel, Jira
- Operating Systems: Ubuntu, MAC OS, Windows 10

Work Experience

Data Specialist

Dec 2021 - Present

WIPRO DOP | Noida, India

- Wipro is an Indian Multinational corporation that provides information technology, consulting and business process services and worked with business partner Alight on various clients which were accessed through Amazon Appstream.
- Coded maps in Informatica 10.5, Informatica CDI-PC and IICS according to clients requirement and have good experience on advanced debugging and testing skills through Informatica.
- Worked in Ms Access for testing the loaded data and PostgreSQL for running DML

- Excellent hands on IBM Mainframe which was accessed through BlueZone.
- Proficient in running and debugging SAS programs(Or JCL/DB2).
- Deep SAS programming skills with advanced SAS functions and deep JCL/Mainframe knowledge.
- Good hands on performing Unit and Integration testing using complex SQL query logics.
- Good hands on Advanced DB2 Relational Database and Data Model skills.
- Good knowledge on Heath and Wealth and Defined Contribution Domains.
- Used Excel and its advanced functions to generate reports for Data Conversion Managers to get a better understanding about discrepancies in data.
- Tracked work allocation and tasks in Jira so good hands on using Jira and its applications.
- Gave training to 3 new colleagues about the process and work.
- Received mail of excellence from the team in USA related to my work ethic and delightful performance during ongoing project.
- Technologies: SQL, Informatica, Mainframe, Excel, MS Access, AQT, AWS, Linux,PowerBi, PostgreSQL,Jira

Data Engineer

Dec 2019 - Dec 2021

APPLICATE AI | Gurugram, India

- Applicate AI(now Salescode.ai) is a start-up building a sales assistant which helps in increasing sales of organizations like Bajaj, Dr. Lalpath, Ambuja, SHELL etc.
- Started working in Ubuntu since joining, with no prior experience and being a quick learner helped in setting up things efficiently .
- Worked on Clickhouse which is a query language and almost similar to MySQL.
- Worked on json files for deploying projects through Clickhouse.
- Worked on database migration of some projects for SHELL and Mars.
- Created various Stored Procedures in MySQL according to project requirement.
- Used Spring Tool Suite 4 for project deployment.
- Worked with jrxml files for creating reports.
- Used Postman api for deploying and testing workflow.
- Used Slack for work tracking.
- Gave training to 4 new colleagues about the work and helped in project related clarities as well
- Technologies: MySQL, Clickhouse, Java, jrxml, JSON, Google Dialogflow,AWS,Slack

Other Experiences

- Machine Learning Project | University Project (2 person) | India 2019
- Developed a model using Keras and TensorFlow which can be used to predict objects and use filters on them.
- Technologies: Python, Keras, TensorFlow, Matplotlib
- Website on Django | Individual | India 2020
- Developed a website on Motivational Quotes Using Django.
- Technologies: Django, Python, Html, JavaScript, CSS

Education

B Tech CSE

2015 – 2019

Amity University | Noida, Uttar Pradesh, India

- Specialized in Computer Science
