Professional Summary

Senior Software Engineer with 4+ years of professional experience in full-stack development, specializing in designing, developing, and deploying scalable software solutions. Proven expertise in backend technologies including Python, Django, and Java, and frontend development with JavaScript. Experienced in leading technical projects, optimizing database schemas, and mentoring team members. Adept at working in agile environments to deliver high-quality, maintainable code.

Skills

Programming Languages: Python, Java, JavaScript, SQL

Backend Frameworks: Django, Spring Boot

Frontend Technologies: HTML, CSS, JavaScript, JSON, XML

Databases: PostgreSQL, MySQL, Clickhouse, DB2

Cloud & DevOps: AWS, CI/CD, Docker, Git, Jira, Linux

Tools: Informatica, Postman, PyCharm, Visual Studio Code, STS4

Professional Experience

Data Specialist | WIPRO DOP | Noida, India | Dec 2021 – Present

- Led the development and deployment of data integration solutions using Informatica, designing and coding complex data maps to meet client specifications.
- Developed and optimized advanced SQL queries for PostgreSQL and DB2 databases, performing unit and integration testing to ensure data integrity and performance.
- Engineered automated reports using Excel and Power BI, effectively communicating data insights to stakeholders and management.
- Utilized AWS and Linux environments for application deployment and management.
- Mentored and trained 3 new team members on project processes and technical standards, improving team onboarding efficiency.
- Recognized with an excellence award from US-based leadership for outstanding project performance and work ethic.

Data Engineer | APPLICATE AI (Salescode.ai) | Gurugram, India | Dec 2019 – Dec 2021

- Designed and developed full-stack features for a sales assistant application using Java, Spring Tool Suite, JavaScript, and Django.
- Developed and maintained RESTful APIs and managed JSON data structures for application workflows, tested using Postman.
- Executed a critical database migration project for SHELL and Mars clients, optimizing schemas and ensuring data consistency across MySQL and Clickhouse systems.
- Created dynamic reports using jrxml and implemented stored procedures to enhance application functionality.
- Collaborated within an agile team using Slack for project tracking and communication.

Projects

Machine Learning Project | Developed a predictive model using Python, Keras, and TensorFlow, implementing object detection and filtering capabilities.

Motivational Quotes Website | Designed and built a full-stack website using Django, Python, HTML,

JavaScript, and CSS.

Education

B.Tech, Computer Science and Engineering | Amity University | Noida, India | 2015 – 2019
