- * ****Cloud & Databases:**** AWS, PostgreSQL, MongoDB, Redis
- * ****Leadership & Methodology:**** Agile/Scrum, Team Leadership, Technical Mentoring, Code Reviews, Sprint Planning

****Professional Experience****

****Senior Frontend Developer**** | TechCorp Inc. | San Francisco, CA | March 2020 – Present

- * Spearheaded a team of 4 developers in the end-to-end design and development of responsive, user-centric web applications using ****React**** and ****TypeScript****.
- * Architected and implemented a reusable ****React component library****, standardizing development practices and ****reducing feature development time by 30%****.
- * Championed a culture of quality by instituting rigorous ****code review processes**** and mentoring 3 junior developers, enhancing team productivity and code maintainability.
- * ****Optimized critical application performance**** through advanced techniques like code-splitting and lazy loading, achieving a ****40% improvement in page load times****.
- * Collaborated closely with UX/UI designers and product managers in an Agile environment to translate complex requirements into intuitive and efficient user interfaces.

****Software Engineer**** | StartupXYZ | San Francisco, CA | June 2018 – March 2020

- * Engineered full-stack features for a SaaS product, utilizing ****React**** for the frontend and ****Node.js**** for backend services.
- * Developed and consumed secure ****RESTful APIs****, enabling seamless integration with third-party services and data systems.
- * ****Implemented comprehensive automated testing**** strategies using Jest and React Testing Library, increasing test coverage by 60% and significantly improving code reliability.
- * Actively participated in all phases of Agile development, including sprint planning, daily stand-ups, and retrospectives.

Education

Bachelor of Science in Computer Science

University of California, Berkeley | 2014 – 2018

Projects

- * **E-commerce Platform:** Led the frontend development of a high-traffic online store using **React** and **Next.js**, focusing on server-side rendering for optimal SEO and performance.
- * **Task Management App:** Built a real-time collaborative application with a **React** frontend, featuring drag-and-drop functionality and live updates via WebSockets.
