

Dear Hiring Manager,

I am writing to express my strong interest in the Senior React Developer position. With over six years of experience in software development, including four years in a senior role, I have been looking for an opportunity to apply my expertise in React and TypeScript within a dynamic environment.

In my previous role as a Senior Software Developer at Tech Corp, I led a team of five developers in building modern web applications using React and TypeScript. I successfully improved system performance by 40% and have hands-on experience with various frontend frameworks. My background aligns well with your requirements for a senior developer who can drive technical excellence.

I am skilled in modern development practices and have a proven track record of collaborating effectively with cross-functional teams. My experience in team leadership and full-stack development, including Node.js and databases, allows me to contribute broadly to your projects.

I am excited about the possibility of bringing my skills and leadership to your team and am confident I can deliver significant value. Thank you for considering my application.

Sincerely,

John Doe
