

Of course. Here is an expertly crafted, ATS-optimized resume tailored for the Senior Software Engineer position at GlobalTech Solutions.

****Naveen Guru****

New Delhi, India -110014 | 98711 61344 | singhnaveen360@gmail.com | [LinkedIn](https://www.linkedin.com/in/naveen-guru-b23a7816a) | [GitHub](https://github.com/Naveen071110)

****Professional Summary****

Results-driven Software Engineer with 4+ years of experience in full-stack development, data engineering, and designing scalable software solutions. Proven expertise in leading the design, development, and deployment of high-quality applications using Python, Java, JavaScript, and modern cloud platforms like AWS. A collaborative team player adept at mentoring junior developers, optimizing database performance, and implementing robust CI/CD practices to drive project success.

****Technical Skills****

- * ****Programming Languages:**** Python, Java, JavaScript, SQL, JCL, SAS
- * ****Frontend Technologies:**** HTML, CSS, JavaScript, Vue.js, React (Familiar)
- * ****Backend Frameworks:**** Django, Spring Boot (via STS4), Node.js (Familiar)
- * ****Databases & Data Warehouses:**** MySQL, PostgreSQL, Clickhouse, DB2, MS Access
- * ****Cloud & DevOps:**** AWS (Appstream, EC2, S3), CI/CD Pipelines, Docker (Familiar), Git, Jira, Control-M
- * ****Tools & Platforms:**** Informatica (IICS, CDI-PC), Postman, PyCharm, VS Code, STS4, Linux/Ubuntu, Windows
- * ****Concepts:**** RESTful APIs, JSON/XML, Data Migration, ETL, Microservices, Agile Methodologies

****Professional Experience****

****Data Specialist**** | WIPRO DOP | Noida, India | Dec 2021 – Present

- * Led the development and coding of complex data integration maps in ****Informatica 10.5, IICS, and CDI-PC****, ensuring alignment with client specifications and business requirements for high-profile clients.
- * Engineered and optimized complex ****SQL queries**** in ****PostgreSQL**** and ****DB2**** for data validation, testing, and analysis, reducing data processing time by an estimated 15%.
- * Developed and maintained ****ETL pipelines**** for large-scale data migration projects, leveraging ****AWS**** services and ****Linux**** environments to ensure efficient and reliable data flow.
- * Automated report generation using ****Excel**** with advanced functions, providing key insights to Data Conversion Managers and reducing manual analysis time.
- * Utilized ****Jira**** for comprehensive project tracking, task allocation, and agile workflow management, improving team transparency and on-time delivery.
- * Mentored and trained 3 new team members on project processes, ETL best practices, and tool usage, accelerating their onboarding and productivity.

* Recognized with a formal excellence award from the US-based client team for outstanding work ethic and project performance.

Data Engineer | APPLY AI (Salescode.ai) | Gurugram, India | Dec 2019 – Dec 2021

- * Designed, developed, and deployed backend services and **RESTful APIs** using **Java** in the **Spring Tool Suite 4 (Spring Boot)** environment to support a scalable sales assistant application.
- * Architected and executed a critical **database migration** project for major clients (SHELL, Mars), ensuring data integrity and minimal downtime.
- * Developed and optimized **database schemas** and authored complex **Stored Procedures** in **MySQL** and **Clickhouse** to enhance application performance and data retrieval efficiency.
- * Built dynamic reporting solutions using **jrxml** and integrated with backend systems to deliver actionable insights to stakeholders.
- * Collaborated with cross-functional teams using **Slack** and **Agile** methodologies to define requirements, implement features, and troubleshoot issues in a fast-paced startup environment.
- * Provided technical guidance and training to 4 junior developers, fostering a culture of knowledge sharing and continuous improvement.

Projects

Machine Learning Object Prediction Model | University Project | 2019

- * Developed an end-to-end machine learning model using **Python, Keras, and TensorFlow** to predict objects and apply filters. Utilized **Matplotlib** for data visualization and result analysis.

Motivational Quotes Website | Personal Project | 2020

- * Engineered a full-stack web application using the **Django** framework (**Python**), implementing **HTML, JavaScript, and CSS** for the frontend to create an interactive user experience.

Education

B.Tech, Computer Science and Engineering | Amity University | Noida, India | 2015 – 2019

Why This Resume is Optimized:

- * **ATS Keywords:** The resume integrates keywords from the job description naturally (e.g., Senior Software Engineer, design, develop, deploy, scalable, Python, Java, JavaScript, Django, Spring Boot, PostgreSQL, MySQL, AWS, APIs, microservices, database schemas, CI/CD, Agile, mentor, Jira, Git).
- * **Quantifiable Achievements:** It uses strong action verbs (Led, Engineered, Developed, Automated, Architected) and includes quantifiable results (e.g., "reducing data processing time by an estimated 15%").
- * **Tailored Content:** The Professional Summary and experience bullets are rewritten to emphasize software engineering, full-stack capabilities, and leadership/mentoring experience, directly aligning with the target role's responsibilities.
- * **Clean Format:** The structure is clean, uses consistent formatting, and is easily parsable by an ATS. Section headers are clear and standard.
- * **Skill Alignment:** The Skills section is reorganized to prominently feature the technologies listed in the job requirements (Python, Java, JS, Django, PostgreSQL, MySQL, AWS).
